SUBJECT INDEX

Acrylic acid (AA), p. 68
Acrylic amide (AAm), p. 68
Acrylic monomers, p. 68
Activation energy, p. 175
Air-handling system, p. 240
Airport terminal buildings, p. 404
ASTM E84 tunnel test, p. 227
Bromate, p. 29
Brominated lignin, p. 29
Brominated timber, p. 29
Bromine, p. 29
Bromo-lignin, p. 29
Cellulose, p. 390
CFAST model verification, p. 240
Channel tunnel, p. 277
Chlorinated polyethylene, p. 375
Combustion, p. 481
Computational fluid dynamics, p. 404
Cone calorimetry, pp. 68, 227, 341, 358
Convection, p. 427
Cotton, pp. 263, 390
Cuprous oxide, p. 341
Decabromodiphenyl oxide, p. 375
Degradation front, p. 358
Degradation modeling, p. 358
Dimensionally stable wood, p. 29
Electron-beam pre-irradiation, p. 68
EVA copolymers, p. 68
Fiberglass composites, p. 108
Fire detection, p. 108
Fire development, p. 240
Fire environment, pp. 240, 443
Fire hazard assessment, p. 14
Fire protection, p. 203
Fire resistance, p. 308
Fire resistant material, p. 203
Fire risk assessment, p. 277
Fire smoke, p. 180
Fire spread, p. 277
Fire zone model, pp. 14, 95
Fireproofing, p. 358
Fires, pp. 95, 240, 427
Flame retardancy, pp. 3, 29, 68, 263, 341, 375
Flame retardant additives, p. 3
Flame retardant consumption, p. 52
Flame retardant markets, p. 52
Flame retardant plywood, p. 29
Flame retardant pulp, p. 29
Flame retardant timber, p. 29
Flame retardants, pp. 52, 227
Flame retarded plastics, p. 52
Flammability testing method, p. 126
Flashover, p. 95
Flexible PVC, p. 227
Fourier transformation, p. 462
Frank-Kamenetskii (F-K) model of thermal ignition, p. 222
FT-IR, p. 108
Fungi resistant timber, p. 29
Grafting, p. 68
Granular synthetic resins, p. 126
Gypsum board, p. 308
Heat balance equation, p. 95
Heat flux, p. 427
Heat release rate (HRR), pp. 68, 277
Heat transfer, p. 358
Heavy goods vehicle, p. 277
High temperature additives, p. 488
High temperature materials, p. 108
HIPS, p. 375
Ignition propensity, p. 462
Ignition times, p. 175
IKP method, p. 358
Illuminance reduction, p. 180
Instability, p. 277
Intumescence, p. 358
Intumescent coating, p. 203
Laplace transformation, p. 462
Lignocellulosic materials, p. 91
Light obscuration, p. 180
Limiting oxygen index (LOI), pp. 3, 68
Linear burn rate, p. 390
Low temperature oxidation, p. 162

(continued)

Subject Index *(continued)*
Magnesium hydroxide, p. 375
Mass burn rate, p. 390
Mass transfer, p. 358
Methyl acrylic acid (MAA), p. 68
Microcalorimetry, p. 481
Molybdic oxide, p. 341
Moving heat source, p. 462
Natural rubber, p. 3
Nonequilibrium state, p. 144
Oxygen index, pp. 126, 227
Phosphorylated cashew nut shell liquid, p. 3
Phosphorylation, p. 263
Polymer, p. 263
Polypropylene, p. 358
Polyurethane foam, p. 390
Post-flashover fire, p. 308
Pressure-vacuum bromination, p. 29
Processed peat, p. 162
PVC, p. 341
Radiation, pp. 427, 443
Risk analysis, p. 14
Saponification, p. 68
Smoke absorption, p. 180
Smoke control, p. 404
Smoke density, p. 3
Smoke emission, p. 341
Smoke management system, p. 240
Smoke scattering, p. 180
Smoke suppressants, p. 227
Smoke test standards, p. 227
Smolder rate, p. 390
Smoldering combustion, p. 390
Smoldering flammable substrate, p. 462
Spectral extinction coefficient, p. 180
Spontaneous heating propensity, p. 222
Sprinkler cooling, p. 95
Sulfamate, p. 263
Sulfation, p. 263
Temperature profile, p. 358
Thermal analysis, p. 358
Thermal decomposition, p. 108
Thermophysical properties, p. 203
Timber, p. 29
Time of ignition (TI), p. 68
Toxic smoke, p. 108
Tunnels, p. 277
UL 94, p. 227
Visibility through fire smoke, p. 180
Vulcanizates, p. 3
Wool, p. 263
Zinc molybdate, p. 227
Zonal assumptions, p. 240
Zone model, pp. 144, 240

AUTHOR INDEX

Beard, A. N., p. 277
Bourbigot, S., p. 358
Burkholder, T. R., p. 108
Cheung, F.-B., p. 488
Chow, W. K., pp. 14, 95, 404
Coppa, P., p. 180
Cox, A. W., p. 227
Dwyer, R. W., p. 390
Georlette, P., p. 375
Green, J., p. 52
Gritzo, L. A., p. 427
He, Y., p. 144
Henderson, K. P., p. 222
Innes, J. D., p. 227
Iwata, Y., p. 126
Jones, J. C., pp. 91, 162, 175, 222, 481
Kellogg, D. S., p. 390
Kinsella, K., p. 108
Koo, J. H., p. 203, 488
La Malfa, A., p. 180
Lach, S., p. 375
Leroy, J.-M., p. 358
Lewin, M., 29, 263
Li, B., p. 341
Lin, E. C. Y., p. 308
Luo, M., p. 240
Luo, M. C., p. 443
Markham, J. R., p. 108
McRae, D. D., p. 390
Mehaffey, J. R., p. 308
Menon, A. R. R., p. 3
Morice, L., p. 358
Nelson, C. M., p. 108

Ng, P. S., p. 488
Nicolette, V. F., p. 427
Richards, G. N., p. 91
Scheinker, M., p. 375
Utevski, L., p. 375
Wang, J., pp. 68, 341
Waymack, B.E., p. 390
Wen, C., p. 68
Xie, L., p. 68
Yanai, E., p. 126
Yi, S.-C., p. 462
Zhang, S., p. 68
